

RAHUL SINGARAPU

FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Dedicated Full Stack Engineer with over 4+ years of experience in architecting and developing high-performance ERP systems and complex automation solutions. Expert in React.js, Node.js, NestJS, and TypeScript. Digitizing large-scale manual workflows. Strong expertise in RESTful API Design, Background Processing (BullJS/Redis), and Database Schema Optimization. Adept at leading cross-functional teams and mentoring junior engineers to deliver scalable, production-ready software.

WORK EXPERIENCE

SCHEMAX

2021 - PRESENT

Full Stack Developer

ERPX (Client: Sandhya Aqua)

- Worked on implementation of Sales, Warehouse, and Logistics modules under guidance of senior developers
- Developed REST API endpoints using NestJS for order creation, updates, and status tracking.
- Built UI components using ReactJS and Ant Design for internal operational workflows

Canteen Management System (Client: Sandhya Aqua)

- Designed and developed a complete Canteen Management System from scratch.
- Improved operational efficiency by digitizing manual canteen processes.

Gate Pass / Delivery Challan Management System (Shahi Exports)

- Led requirement gathering directly with users and implemented end-to-end workflows.
- Enabled audit-friendly tracking and reports for inter-unit transfers.

ERP-integrations (Xpparel)

- Owning development of third-party integrations for the ERP platform
- Implemented background job processing using BullJS and Redis for asynchronous operations.

Web Automation Solutions (Various Clients)

- Developed browser automation scripts using Puppeteer, Selenium, and Playwright for handling repetitive tasks (form submissions, data fetching).
- Implemented error handling and retries to improve reliability of automation workflows.

Full Time Employee (Client: Shahi Exports)

- Developed multiple in-house applications and process automation's to support apparel manufacturing operations.
- Took ownership of end to end development including requirement gathering directly from business users, design and implementation.
- Improved system reliability and efficiency through API optimization, validation, and reusable component development

EDUCATION

2017 - 2020

SAI GANAPATHI ENGINEERING COLLEGE

- Batchelor's in MECH

EXPERTISE

- Business Process Digitization
- Requirement Gathering & Freezing
- Software Architecture & System Design
- Full Stack Development (Node.js, React)
- RESTful API & Microservices Design
- Problem Solving & Root Cause Analysis
- Team Mentorship
- Cross-Domain Systems Integration
- Database Modeling & Optimization
- Built scalable UI components

SKILLS

- REACT
- NODE JS
- NEST JS
- REDIS
- MY SQL
- MICRO SERVICES
- PUPPETEER
- SELENIUM
- PLAYWRIGHT
